Claim 1 is allowable because the prior art of record, taken alone or in combination, fails to disclose or render obvious a scanning analyzer unit comprising a scanner device for scanning a testing support for supporting a reaction of analytes in a sample to achieve color separation, wherein the scanner device outputs a test signal corresponding to concentrations of analytes, and wherein the scanner device comprises a light emission diode array, in combination with the rest of the limitations of claim 1.
6. Claims 5-7 are allowable because they are dependent on independent claim 1, or an intermediate claim, and they include all the allowable limitations of the parent claim(s).
